Innovative Solution Customizes Delivery Vans to Help Edible Arrangements Go Green

Recently, leaders at Edible Arrangements were recognized by Thermo King, a business of Ingersoll Rand, for taking a bite out of fuel costs and pollution. They have developed an innovative way to refrigerate their artistically designed fresh fruit arrangements during delivery. Using customized vans with all-electric cooling, they anticipate diesel fuel savings of 27 percent over traditional vans.

Because of their commitment to environmental responsibility, leaders at Edible Arrangements received the first-ever Thermo King "Energy Efficiency Leader Award" for the operational efficiency of these vans.

Attached is a video, photos and captions as well as the news release from the event that you can use in stories that you may be writing.

In addition, leaders from Thermo King are available for interviews to discuss challenges facing the industry and how they are helping customers meet those needs as well as industry environmental requirements, current and future regulations, trends and hot-button issues.

About Thermo King

Thermo King, a business of Ingersoll Rand - the world leader in creating and sustaining safe, comfortable and energy efficient environments, was founded in 1938 and manufactures transport temperature control systems for a variety of mobile applications, including trailers, truck bodies, buses, shipboard containers and railway cars. The company operates 10 manufacturing facilities and 17 parts distribution centers worldwide. Sales and service is provided by a global dealer network of 865 independently owned companies in 75 countries. For more information, visit www.thermoking.com

About Ingersoll Rand

Ingersoll Rand (NYSE:IR) is a world leader in creating and sustaining safe, comfortable and efficient environments in commercial, residential and industrial markets. Our people and our family of brands— including Club Car®, Hussmann®, Ingersoll Rand®, Schlage®, Thermo King® and Trane® — work together to enhance the quality and comfort of air in homes and buildings, transport and protect food and perishables, secure homes and commercial properties, and increase industrial productivity and efficiency. We are a \$13 billion global business committed to sustainable business practices within our company and for our customers. For more information, visit www.ingersollrand.com.
